

KLINGER® TOP-CHEM PTFE GASKET MATERIALS

For ultimate chemical resistance

Our PTFE-based soft sealing material range guarantees ultimate chemical resistance and is designed to cater for the majority of gasket applications. Products from the KLINGER® TOP-CHEM range are tailored to provide the characteristics required by their target industries. Amongst others, this includes tightness even at low surface pressures, high resistance against strong acids or strong alkaline solutions as well as good properties at medium and low temperatures.

KLINGER TOP-CHEM 2000

TOP-CHEM 2000, a PTFE gasket filled with silicon carbide, offers unique mechanical properties and is the only PTFE gasket material with a fire-safe certificate worldwide.

Areas of application:

Excellent resistance in strongly acidic and alkaline applications as well as to steam and oxygen. Suitable for an extremely wide range of applications in the chemical and petrochemical industry, as well as in the ship building industry for the transport of chemicals.

Key features:

- » Mechanically stable
- » Resistant to creep and cold flow
- » Consistent material composition

KLINGER TOP-CHEM 2003

TOP-CHEM 2003 is a soft, but stable filled PTFE gasket material offering the best mechanical properties and excellent adaptability even at low surface loads.

Areas of application:

Excellent chemical resistance in strongly acidic and alkaline applications as well as very good properties at medium temperatures and loads.

Key features:

- » High compressibility
- » Consistent material composition
- » Resistant to cold flow

KLINGER TOP-CHEM 2005

TOP-CHEM 2005 is a PTFE gasket with inorganic fillers which offers outstanding performance in acidic applications in the chemical industry.

Areas of application:

Suitable for a wide range of applications in the chemical industry. Economical alternative at the usage of filled PTFE gaskets.

Key features:

- » Mainly for use in acids
- » Consistent material composition
- » Resistant to cold flow

KLINGER TOP-CHEM 2006

TOP-CHEM 2006, a PTFE-based gasket filled with Barium sulphate, offers resistance in strong alkaline applications and good mechanical properties.

Areas of application:

Suitable for a wide range of applications in the chemical industry. This gasket material is free from pigments.

Key features:

- » Mainly for use in alkaline media
- » Consistent material composition
- » Resistant to cold flow

KLINGER TOP-CHEM 2000SOFT

TOP-CHEM 2000soft is a porous PTFE sealing grade filled with silicon carbide showing exceptional performance with high mechanical requirements. KLINGER® TOP-CHEM 2000soft has a high conformability and is ideal for maintaining a tight seal even at low surface loads.

Areas of application:

Superior chemical resistance in strongly acidic and alkaline applications. It shows exceptional performance in applications with high mechanical requirements at high temperatures.

Key features:

- » High compressibility
- » Resistant to creep and cold flow
- » Mechanically stable
- » Consistent material composition

KLINGER SOFT CHEM

Soft-chem is a multi-directional expanded PTFE, which combines excellent corrosion resistance and superior sealing capabilities.

Areas of application:

Excellent corrosion resistance together with superior sealability create a high-grade gasket material for a wide field of applications in your plant.

Key features:

- » Multi-directional expanded PTFE
- » Suitable for a wide range of applications

BENEFITS

- » Easy handling
- » No embrittlement
- » No aging reaction
- » Weldable
- » No sticking on flanges

Broad application coverage:

- » Temperature range from -200°C up to +260°C
- » Excellent chemical resistance in strongly acidic and alkaline applications
- » Used in the pharma industry, food industry, chemical industry, energy sector, in oxygen pipelines etc.

Leading mechanical stability with Top-Chem-2000

- » Long service life because of high stress retention
- » High residual stress
- » TOP-CHEM 2000 has the lowest creep on the market

Leading mechanical stability

ABOUT US

Leaders in sealing, fluid control, and joint integrity services.

As the industry's preferred partner for the production and development of high-quality soft sealing materials, our sales and technical support combines unsurpassed material know-how with world-class application expertise.

Our UK manufacturing and distribution network is coordinated from our head office in Bradford, West Yorkshire, which holds extensive stocks of semi-metallic gaskets, metals and non-metallic sheeting materials and features cutting-edge robotic manufacturing equipment.

The KLINGER global network makes sure that our materials and services are available to you locally no matter where you are.

SERVICE

Perfect extension of KLINGER quality standards:

- » Quality control and R&D lab
- » Digital support
- » Certifications

We are committed to meeting and exceeding the expectations of our customers.

We supply a gratifying experience with service and leading products including:

- » Engineering support
- » Product testing
- » Support at proper gasket selection
- » Training

APPROVALS

KLINGER products deliver proven user safety. Our products are amongst the most approved and certified products within the industry.

For more information please visit our website www.klinger.co.uk

- » Fire-safe approval
- » TA-Luft approval (clean-air)
- » DVGW approval
- » KTW approval
- » FDA conformity
- » DNV GL approval
- » OXYGEN-tested
- » WRAS approval
- » DVGW W 270 approval
